

Evidence Pack

Sentinel
IP Detection Sentinel

1 User identity analysis

Biovein®

2 The Sentinel is triggered when the door opens

3 In case of an alert, the images are instantly transmitted to our secure server

Control and supervision

4 You then receive an alert (e-mail, SMS or voice message) and only need to touch your TSM® Touch (Mobile Tactile Security Terminal) to view your site remotely, in real time, as well as any stored images of alerts (which can also be viewed from any online computer)

Any online computer
(not supplied)
